

Name: Vaibhav Patel (Email: vaipate@siue.edu)

Course: CS-434

Instructor: Dr. Mark McKenney

Project 3 README

In CS434_VaibhavPatel_P3 folder, I have CS434_VaibhavPatel_P3_sqlscript.pdf file, which contains all commands that are used to create patelinsurance database, to create 12 tables with primary and foreign key constraints, to insert data into 12 tables. I am using xampp server to access mysql, which provides really good interface to create tables and insert data into the tables. In this folder, I also have CS434_VaibhavPatel_P3_proof.pdf file, which contains pictures of 12 tables schema, and pictures of data inserted into tables.

Thank You for reading,

Vaibhav Patel
